## **CAPA Approves Magneti Marelli Parts & Services for Its Tier 1 Replacement Parts Verification Program**

**Kentwood, Mich. – December 15, 2022** – The Certified Automotive Parts Association (CAPA), an independent non-profit standard-setting and certification organization for automotive crash parts, is pleased to announce that Magneti Marelli Parts & Services has received CAPA approval to participate in its Tier 1 Replacement Parts Verification Program. The program is available for any Tier 1 supplier that also produces an in-house, alternately branded version of car company original (CCO) or car company service (CCS) parts used for automotive repair.

For 35 years, CAPA has delivered a comprehensive certification program to identify high-quality, alternative replacement parts. Drawing on the strength of its certification program and its third-party testing partner's expertise in testing and certification, CAPA developed this verification program to expand our offering and brand to Tier 1 replacement parts and their suppliers.

"CAPA is thrilled to welcome Magneti Marelli Parts & Services as an approved supplier in its Tier 1 Verification Program," said Clark Plucinski, Chairman, CAPA Board of Directors. "With the addition of each and every participating supplier to the program, CAPA is able to further its mission of ensuring consumers have access to high quality automotive replacement parts that will fit, perform, last, and be every bit as safe as the originals."

CAPA Tier 1 Verified parts must also demonstrate compliance to all applicable federal regulations. These efforts help to ensure there are no differences when a supplier changes production from manufacturing the car company parts to the Tier 1 branded version of the part.

"Magneti Marelli Parts & Services is very proud of this major achievement as it underscores our commitment to our customers and our total dedication to quality and innovation. We are extremely pleased to bring Tier 1 verified parts to the market. Tier 1 verification is not only a great accomplishment for us, but for the entire aftermarket," said Graham Donald, Head of Export, EMEA Markets and Business Development.

With Magneti Marelli Parts & Services' successful completion of CAPA's approval process, it may begin submitting parts for verification. Verified parts will be announced via CAPA's weekly updates and are listed on CAPA's website, and they can be identified by the CAPA Tier 1 Verified label. To sign up for CAPA's weekly updates, or for more information, go to [www.CAPAcertified.org](http://www.CAPAcertified.org).

###

**About CAPA**

The Certified Automotive Parts Association, founded in 1987, is the nation's only independent, non-profit certification organization for automotive crash parts whose sole purpose is to ensure that both consumers and the industry have the means to identify high-quality parts via the CAPA Quality Seal. CAPA is an ANSI-accredited standards developer for competitive crash repair parts. For more information see [CAPACertified.org](http://CAPACertified.org).
