CAPA'S VEHICLE TEST FIT FACILITY RECOGNIZED BY ASE BLUE SEAL OF EXCELLENCE PROGRAM

Only 1,600 Facilities in the Nation are Currently in the Program

WASHINGTON, DC – The Certified Automotive Parts Association's Vehicle Test Fit facility has earned the Blue Seal of Excellence Recognition from the National Institute for Automotive Service Excellence (ASE), a non-profit organization dedicated to improving the quality of vehicle repair and service through testing and certification of automotive repair and service professionals.

To be eligible for this recognition, a facility must have 75% of its automotive professionals ASE certified. In addition, there must be a certified technician in each area of service offered. To remain in the program, a facility must renew each year and confirm their professionals' certification status.

"We salute those businesses who achieve this goal and thank them for helping promote quality automotive repair and service," says Ronald H. Weiner, ASE president.

"Our acceptance into ASE's Blue Seal of Excellence program further demonstrates CAPA's commitment to quality, and we are proud of this achievement," said Jack Gillis, executive director of the non-profit association. "CAPA has gone the extra mile to have all our Vehicle Test Fit technicians become ASE Master certified, and now the facility itself has been recognized as meeting ASE's quality standards."

ASE was founded in 1972 as a non-profit, independent organization dedicated to improving the quality of automotive service and repair through the voluntary testing and certification of automotive technicians.

The Certified Automotive Parts Association, founded in 1987, is the nation's only independent, non-profit, third party crash parts quality certification organization. CAPA certification identifies, for both consumers and the industry, those parts that meet our high quality standards for fit, form, finish, material content and corrosion resistance.
