U.S. MANUFACTURER APPROVED AS CAPA PARTICIPANT *Production Bumper Stampings, Inc. Passes Stringent Quality Inspection*

WASHINGTON, DC. – The Certified Automotive Parts Association (CAPA) announces that Production Bumper Stampings, Inc. (PBSI), a metal stamping facility headquartered in Memphis, Tennessee, is now a participating CAPA manufacturer. This brings the total number of CAPA manufacturers to 32. In order to be approved as a CAPA manufacturer, PBSI passed a detailed review and inspection of its quality system and manufacturing processes.

“Production Bumper Stampings’ decision to comply with CAPA’s comprehensive quality standards is a strong indication of their desire to build parts that meet the demands of today’s collision repairers,” said Jack Gillis, Executive Director of the independent, non-profit association. “Complying with CAPA quality standards requires an attention to detail, understanding of the importance of fit and finish, and consistent manufacturing processes, all of which are important to Production Bumper Stampings.”

“Production Bumper Stampings is pleased to become a part of the CAPA organization and look forward to providing the aftermarket industry with quality manufactured products, said Mike O’Neal, President of Production Bumper Stampings, Inc.”

The Certified Automotive Parts Association, founded in 1987, is the nation’s only independent, non-profit, third party crash parts quality certification organization. CAPA certification identifies, for both consumers and the industry, those parts that meet our high quality standards for fit, form, finish, material content and corrosion resistance.
