GREAT BESTCAM JOINS CAPA LIGHTING PROGRAM

WASHINGTON, DC. – The Certified Automotive Parts Association (CAPA) announces that Great BestCam Co., Ltd., headquartered in Taipei Hsien, Taiwan, has joined the CAPA lighting program.

Established in 1991, Great BestCam has been a long-time producer of plastic parts, and more recently has begun producing fog lamps.

“Great BestCam is the latest lighting manufacturer who has demonstrated that they are willing to meet the collision repair industry’s demand for CAPA certified lights,” said Jack Gillis, Executive Director of the non-profit association. “We are pleased to be able to announce their commitment to CAPA’s quality standards.”

“We believe that the CAPA process will help us to achieve two things: raise our own quality levels, and help us to better serve the needs of the American market,” said Mr. Ho, owner of Great BestCam.

In order for a lamp to become CAPA certified, it must be validated through CAPA’s independent, third-party testing to determine that it passes FMVSS 108, meets CAPA’s requirements for structural and material comparability to its car company counterpart and properly fits on a vehicle. CAPA’s unique and precise Vehicle Test Fit program helps ensure the quality of every CAPA certified part.

The Certified Automotive Parts Association, founded in 1987, is the nation’s only independent, non-profit, third party crash parts quality certification organization. CAPA certification identifies, for both consumers and the industry, those parts that meet our high quality standards for fit, form, finish, material content and corrosion resistance.
