GREAT BESTCAM CERTIFIES LIGHTS TO CAPA 301 LIGHTING STANDARD

Washington D.C. – The Certified Automotive Parts Association (CAPA) announces that Great BestCam Co., Ltd., that has certified their first parts to the CAPA Lighting Standard 301. Achieving CAPA certification are the right and left fog lamps for the Nissan Altima 2002-04, Nissan Murano 2003-05, Infiniti FX35 2003-05, and Infiniti FX45 2003-05.

“The fact that Great BestCam only recently joined the CAPA program and has already successfully completed the certification process on their first lamps, demonstrates their motivation in providing high quality replacement parts to the U.S. market,” said Jack Gillis, Executive Director of CAPA.

In order to achieve CAPA certification, lighting products must pass initial and on-going testing for fit, form, appearance, composition, coating performance, mechanical properties, adhesives, fasteners, hardware, photometric performance, electrical performance, aiming performance and compliance with Federal Motor Vehicle Safety Standard 108. CAPA is the only independent certifying agency which requires, and test for compliance to FMVSS108. CAPA is, the best way consumers and the industry can be assured that the lights they use comply with all government safety requirements.

The Certified Automotive Parts Association, founded in 1987, is the nation's only independent, non-profit, third party crash parts quality certification organization. CAPA certification identifies, for both consumers and the industry, those parts that meet our high quality standards for fit, form, finish, material content and corrosion resistance.
